

Resource Hero Calculation Fields

Description	Field Type	Field Label	Field Name	Length	Decimal Places	Default Value	API Name	Formula
The total amount based on the sum of all actual hours inputted multiplied by the resources' rates.	Currency	RH Total Actual Amount	RH_Total_Actual_Amount	16	2	0	RH_Total_Actual_Amount__c	NA
The total of all hours inputted within the actual and time tracking matrices.	Number	RH Total Actual Hours	RH_Total_Actual_Hours	16	2	0	RH_Total_Actual_Hours__c	NA
The total amount based on the sum of all forecast hours inputted multiplied by the resources' rates.	Currency	RH Total Forecast Amount	RH_Total_Amount	16	2	0	RH_Total_Amount__c	NA
The total of all hours inputted within the forecast matrix.	Number	RH Total Forecast Hours	RH_Total_Hours	16	2	0	RH_Total_Hours__c	NA
A formula that calculates the difference between the Actual and the Forecast amount.	Formula/Currency	RH Remaining Forecast Amount	RH_Remaining_Forecast_Amount	16	2	NA	RH_Remaining_Forecast_Amount__c	$RH_Total_Amount_c - RH_Total_Actual_Amount_c$
A formula that calculates the difference between the Actual and Forecasted hours.	Formula/Number	RH Remaining Forecast Hours	RH_Remaining_Forecast_Hours	16	2	NA	RH_Remaining_Forecast_Hours__c	$RH_Total_Hours_c - RH_Total_Actual_Hours_c$
A formula that calculates the blended rate by dividing the total Forecasted hours by the total Forecasted Amount.	Formula/Currency	RH Blended Rate	Calculated_Blended_Rate	16	2	NA	Calculated_Blended_Rate__c	$if(RH_Total_Hours_c > 0, RH_Total_Amount_c / RH_Total_Hours_c, 0)$
